Advanced Enrolment Software™

Specific features & benefits

Application pipeline

A summary screen allows schools and agents to quickly view, update and manage all applications in real time on your desktop, tablet or mobile from anywhere in the world.

Faster response times

With real time updates, automated prompts and simplified actions for all users, Enroller significantly improves response times by reducing manual paperwork.

Simple SMS data entry

Create a student profile in your SMS by quickly importing the enrolled student data from Enroller.

Language assist

Key screens in Enroller are translated to improve the experience for your agents and direct applicants, making it easier to complete your online application form.

Managing new enquiries

Bring your enquiries into one easy-to-manage place. Quickly make notes, set reminders to follow up and link leads with applications to track conversion rates.

One click, compliant documentation

Our automated document builder creates Visa compliant offers, invoices and receipts at the click of a button.

Real time analytics & reports

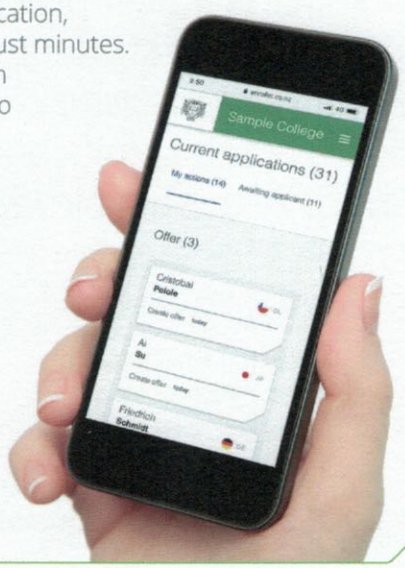
Enroller's dashboard shows live conversion rates and allows you to monitor agent performance, analyse trends and generate department reports.

Simple implementation

As a secure cloud application, implementation takes just minutes. It's as easy as putting an 'Apply Now' button on to your school website.

"Enroller perfectly fills a gap that exists in the school sector and will significantly enhance the way we manage our international student pipeline. I have been waiting for a product like this that specifically meets the needs of the school sector, and am excited to be coming on board as an early adopter"

Guy Pascoe, Director International Services, Scots College



How Enroller works

Enroller is a powerful 'shared workflow' engine that provides schools, agents and applicants with shared visibility, prompts and documentation at each stage of the enrolment process.

Step-by-step guidance

You and your agents or applicants are notified via email when the status of an application has changed or an action is completed or updated. When something changes, you will be guided as to what you, or your agent, is required to do next.

Automating repetitive tasks

Enroller saves you time by automating repetitive tasks, allowing international student departments to spend more time collaborating with colleagues or nurturing agent and family relationships - improving the student experience.

The workflow process

Each step of the Enroller process was researched and designed in collaboration with New Zealand schools and their agents to improve the speed, efficiency and consistency of the enrolment process.
